

Instrument for determining the humidity of wood and building materials

**Ideal for on-site check of humidity
in wood and building materials
(walls and floor)**

- 2 separate measuring scales for wood and building materials
- Automatic function test
- Manual battery test
- Incl. fixing clip and bag
- Rubberized sides for secure handling
- Shockproof material

Specifications

Measuring principle:	Electric resistance
Length of electrode:	8 mm
Accuracy wood:	$\pm 1 \%$ (measuring range 6 ... 44 %)
Accuracy building materials:	$\pm 0,05 \%$ (measuring range 0,2...2,0 %)
Housing:	Shockproof material
Working temperature:	0 - 40 °C
Dimensions:	130 x 40 x 21 mm
Weight:	100 g
Response time:	1,0 s

Item-no. 6500
